

RM-10352

I DO NOT SUPPORT THIS PETITION BECAUSE IT IS NOT CONSISTENT WITH THE WAY OTHER COUNTRIES USE THIS BAND{MOST DX BETWEEN 1835+1845} creating another 40m mess! having to work split. Being that CW can use the whole band I do not think it is necessary to set an upper limit of 1843 when a limit of 1835 would work for both narrow and wide band operators. And not a limit that benefits only one group of people because of THEIR preferred mode of operation {such as the group who decide this new band plan that does not work!!}. Setting a limit is fine, but lets set one that works for all NOT JUST ONE GROUP.
